

California Department of Justice

Bureau of Criminal Identification and Investigative Services

Department of Justice Administrator II Mike Small has 30 years of criminal justice program and administrative experience with the California Department of Justice (DOJ). Mr. Small began his career as an intelligence analyst in narcotics enforcement and organized crime, managed firearms regulatory activities, served as Assistant Director of the Western State Information Network (WSIN), and served as manager of DOJ's Intelligence Operations Program. Mr. Small assumed program manager duties for DOJ's CURES/PDMP program during December 2011. Mr. Small has a B.A. from the University of Southern California.

Two keys to prescription acquisition...

The Prescriber
The Dispenser

pdmp

Most prescription painkillers are prescribed by primary care and internal medicine doctors and dentists, not specialists.

Roughly 20% of prescribers prescribe 80% of all prescription painkillers.

Commission on Prescription Monitoring
STATE MEDICAL BOARDS

pdmp Office of National Drug Control Policy

Education: critical for the public and for healthcare providers to increase awareness about the dangers of prescription drug abuse, and about ways to appropriately dispense, store, and dispose of controlled substance medications.

Tracking and Monitoring: the enhancement and increased utilization of prescription drug monitoring programs will help to identify “doctor shoppers” and detect therapeutic duplication and drug-drug interactions.

Proper Medication Disposal: the development of consumer-friendly and environmentally-responsible prescription drug disposal programs may help to limit the diversion of drugs.

Enforcement: provide law enforcement agencies with support and the tools they need to expand their efforts to shut down “pill mills” and to stop “doctor shoppers” who contribute to prescription drug trafficking.

Epidemic: Responding to America's Prescription Drug Abuse Problem. Office of National Drug Control Policy, 2011, Pages 2-8

CDC Prevention Strategies

Prescription Monitoring...

to stop users of multiple providers for the same drug.
Insurers can contribute substantively.

Improve legislation and enforcement of existing laws...

i.e., anti-doctor shopping and pill mill

Improve medical practice in prescribing opioids...

to update prescribers on under-appreciated risks
of high-dosage therapy and provide evidence-based
guidelines

Prescription Drug Monitoring Program (PDMP) Agency Types

Current CURES/PDMP Program

- CURES stores and reports Schedule II, III and IV prescription dispensation data reported by dispensers to DOJ.
- Pharmacists are required to report dispensations of Schedules II through IV controlled substances at least weekly.
- In order to reflect exactly what dispensers report to DOJ, the department does not touch or modify dispenser-reported data.
- Presently, the database contains over 100 million entries of controlled substance drugs that have been dispensed in California.

Current CURES/PDMP Program

- In FY 11/12, the program responded to 1,063,952 requests.
- Provides registered prescribers and dispensers with 6- or 12-month Patient Activity Reports (PAR).
- CURES/PDMP serves the public health and the public safety. CURES data can assist health practitioners identify, intervene, and deter abuse of scheduled drugs. CURES data can assist investigators, regulators, and prosecutors.
- Use of the PDMP by prescribers and dispensers for prescription abuse prevention/intervention is *voluntarily*.

CURES 2.0 Integration / Interoperation

PDMPs need to integrate and interoperate with the major health care systems in their regions.

PDMP data can be rendered by the health care system to be presented with the EHR when the practitioner walks into the exam room to see the patient.

CURES 2.0

Integration / Interoperation

Integration/Interoperation will leverage a trust arrangement that the various interoperation partners vet their respective members.

Integration/Interoperation can facilitate peer-to-peer collaboration.

Integration/Interoperation can facilitate “watch” flags across member systems.
