Pursuant to Business and Professions Code (BPC) section 684(b)(1), a physician who performs one or more stem cell therapies that is subject to the U.S. Food and Drug Administration (FDA) regulation, but is not FDA-approved, must provide notice to the patient seeking stem cell therapy that the physician provides stem cell therapy that has not been FDA-approved and that the patient is encouraged to consult with their primary care provider prior to undergoing stem cell therapy. BPC section 684 (e) also requires the Medical Board of California (Board) to report in its Annual Report for FY 2018/19 complaints, disciplinary actions, and administrative actions related to failure by a physician to provide appropriate notice to consumers prior to providing initial stem cell therapy.

The purpose of the Stem Cell and Regenerative Therapy Task Force (Task Force) is to receive information and input from interested parties on options to promote consumer protection within the Board's authority. In order to conduct a successful meeting in the time allotted, any interested party may notify the Board they will be attending and provide written materials for the Task Force to consider. The submission of materials prior to the meeting is encouraged, but voluntary, to allow the Task Force Members time to review the materials prior to the meeting. If you wish to submit materials, please email them to April.Alameda@mbc.ca.gov by noon on September 13, 2019.

Meetings of the Board are open to the public except when specifically noticed otherwise in accordance with the Open Meeting Act. The audience will be given appropriate opportunities to comment on any issue presented in open session before the Task Force, but the Chair may apportion available time among those who wish to speak. For additional information, call (916) 263-2348.

NOTICE: The meeting is accessible to the physically disabled. A person who needs a disability-related accommodation or modification in order to participate in the meeting may make a request by contacting April Alameda at (916) 263-2348 or send a written request to april.alameda@mbc.ca.gov. Providing your request at least five business days before the meeting will help ensure availability of the requested accommodation.

The mission of the Medical Board of California is to protect health care consumers through the proper licensing and regulation of physicians and surgeons and certain allied health care professionals and through the vigorous, objective enforcement of the Medical Practice Act, and to promote access to quality medical care through the Board's licensing and regulatory functions.
