

Patient Notification Task Force Mission

Mission Statement: The mission of the Patient Notification Task Force is to explore methods to address concerns regarding patients being unaware that a physician is on probation.

Objectives: The objectives of the Task Force are to explore possible additions and/or improvements to existing methods of informing patients when physicians are on probation.

Items for the Task Force to explore and consider may include:

- the current distribution method of information regarding a physician on probation;
- the information that is currently available to members of the public for its review and consideration;
- the sign that is required to be posted regarding the physician being regulated by the Board;
- the disciplinary guidelines; and
- any other changes that can assist patients to be aware of the information available to them regarding their physician or potential physician.

At the conclusion, the Task Force will provide a report, with possible recommendations, to the Board for its consideration and/or approval.
