From: Janie Cordray,
 Research Program Manager

Subject: Comments proposing revisions to the 11th edition of the *Manual of Disciplinary Guidelines and Model Disciplinary Orders*, incorporated by reference in the proposed rulemaking.

Since the proposed rulemaking was noticed, we have received requests from staff at the Attorney General's Health Quality Enforcement Section and the Board's Enforcement Program that further modifications be made to the 11th edition of *Manual of Disciplinary Guidelines and Model Disciplinary Orders*.

As the members can see in the rulemaking materials, the proposed regulation incorporates the *Manual* by reference, and, therefore, any modifications not already noticed must be adopted by the members as part of the regulatory process. (Procedurally speaking, at the regulatory hearing, if the members are agreeable to the changes they will delegate their adoption authority to the Executive Director, staff will publish a 15-day notice, and the Director will adopt them on the Board's behalf after the public comment period has ended.)

The following are the requested modifications (in **bold** print):

Respondent is prohibited from engaging in the solo practice of medicine.

Prohibited Solo practice includes, but is not limited to, a practice where: 1) **respondent** physicians merely shares office space **with another physician** but **is are** not affiliated for purposes of providing patient care, or 2) **where** respondent **is would be** the sole physician practitioner at that location.

34. Non-practice While on Probation

Practicing medicine in another state of the United States or Federal jurisdiction while on probation with the medical licensing authority of that state or jurisdiction shall not be considered non-practice. A Board-ordered suspension of practice shall not be considered as a period of non-practice.

In the event respondent's period of non-practice while on probation exceeds 18 calendar months, respondent shall successfully complete a clinical training program that meets the criteria of Condition 19 of the current version of the Board's "Manual of Model Disciplinary Orders and Disciplinary Guidelines" prior to resuming the practice of medicine.

Respondent's period of non-practice while on probation shall not exceed two (2) years.

Periods of non-practice will not apply to the reduction of the probationary term.

Periods of non-practice will relieve respondent of the responsibility to comply with the probationary terms and conditions with the exception of this condition and the following terms and conditions of probation: Obey All Laws; and General Probation Requirements.

To date, these are the only comments received. Any future comments submitted in writing during the comment period will be forwarded to the members for their consideration at the public hearing.

**STATE OF CALIFORNIA
MEDICAL BOARD OF CALIFORNIA
MODEL DISCIPLINARY ORDERS AND
DISCIPLINARY GUIDELINES**

Business and Professions Code section 2229 mandates protection of the public shall be the highest priority for the Medical Board and for the Administrative Law Judges of the Medical Quality Hearing Panel. Section 2229 further specifies that, to the extent not inconsistent with public protection, disciplinary actions shall be calculated to aid in the rehabilitation of licensees. To implement the mandates of section 2229, the Board has adopted the Manual of Model Disciplinary Orders and Disciplinary Guidelines (guidelines), 1140th Edition. Consistent with the mandates of section 2229, these guidelines set forth the discipline the Board finds appropriate and necessary for the identified violations. In addition to protecting the public and, where not inconsistent, rehabilitating the licensee, the Board finds that imposition of the discipline set forth in the guidelines will promote uniformity, certainty and fairness, and deterrence, and, in turn, further public protection.

The Board expects that, absent mitigating or other appropriate circumstances such as early acceptance of responsibility, and demonstrated willingness to undertake Board-ordered rehabilitation, the age of the case, and evidentiary problems, Administrative Law Judges hearing cases on behalf of the Board and proposed settlements submitted to the Board will follow the guidelines, including those imposing suspensions. Any proposed decision or settlement that departs from the disciplinary guidelines shall identify the departures and the facts supporting the departure.

The Model Disciplinary Orders contain three sections: three (3) Disciplinary Orders; twenty-four ~~three~~ (24) Optional Conditions whose use depends on the nature and circumstances of the particular case; and eleven ~~thirteen~~ (11) Standard Conditions that generally appear in all probation cases. All orders should place the Order(s) first, optional condition(s) second, and standard conditions third.

~~The Model Disciplinary Guidelines list proposed terms and conditions for more than twenty-four (24) sections of the Business and Professions Code.~~

Non-practice is defined as any period of time exceeding thirty 30 calendar days in which respondent is not engaging in any activities defined in sections 2051 and 2052 of the Business and Professions Code.

All time spent in an intensive training program which has been approved by the Board or its designee shall be considered time spent in the practice of medicine. For purposes of this condition, non-practice due to a Board-ordered suspension or in compliance with any other condition of probation, shall not be considered a period of non-practice.

Upon formal acceptance of the surrender, respondent shall within 15 calendar days deliver respondent's wallet and wall certificate to the Board or its designee and respondent shall no longer practice medicine. Respondent will no longer be subject to the terms and conditions of probation ~~and the surrender of respondent's license shall be deemed disciplinary action~~. If respondent re-applies for a medical license, the application shall be treated as a petition for reinstatement of a revoked certificate.

389. Probation Monitoring Costs

Respondent shall pay the costs associated with probation monitoring each and every year of probation, as designated by the Board, which may be adjusted on an annual basis. Such costs shall be payable to the Medical Board of California and delivered to the Board or its designee no later than January 31 of each calendar year. ~~Failure to pay costs within 30 calendar days of the due date is a violation of probation.~~

MEDICAL BOARD OF CALIFORNIA

INITIAL STATEMENT OF REASONS

Hearing Date: October 30, 2009

Subject Matter of Proposed Regulations:

To amend the *Manual of Model Disciplinary Orders and Disciplinary Guidelines* to reflect changes in law, clarify existing language, and make technical changes to reflect the current probationary environment.

Section(s) Affected:

Amend Section 1361 in Article 4 of Chapter 2, Division 13

Specific purpose of each adoption, amendment, or repeal:

The current *Manual of Model Disciplinary Orders and Disciplinary Guidelines* referenced in the regulation (10th Edition/2008) must be made consistent with current law. The proposed regulation will reference the 11th Edition/2009 of the *Manual of Model Disciplinary Orders and Disciplinary Guidelines*, reflecting changes in law, as well as making technical changes to address unnecessary and duplicative elements, and some technical changes to reflect the current probationary environment.

Factual Basis/Rationale:

The *Manual of Model Disciplinary Orders and Disciplinary Guidelines* referenced by the current regulation has been amended to conform to statutory changes, including those in the California Uniform Controlled Substance Act, augment and delete language for reasons of consistency and clarity, as well as make some technical changes to probationary conditions for disciplined physicians. In addition to changes to conform to current law and amendments for clarity and consistency, the *Guidelines* have been amended to:

- Require probationers to cease the practice of medicine when testing positive in a biological fluid test for illegal or unlawfully prescribed substances or alcohol.

Due to a change in law, the Medical Board no longer has a Diversion Program to monitor physicians with substance abuse problems. In the past, the physicians were ordered into the Diversion Program, and the program had the authority to order physicians, when testing positive from a biological fluid test, to cease practicing medicine. While the previous *Guidelines* were amended to reflect the elimination of the Diversion Program, it did not contain the specific condition that the Board could order physicians testing positive to cease practice.

- Expand and define “Biological Fluid Testing” to include blood, urine, breathalyzer, and hair follicle testing.

Due to technological changes in drug testing, it is preferable to define “Biological Fluid Testing” to include other methods that may be able to detect some substances that are not picked up by a urine test. This is necessary to protect the public by allowing for better drug and alcohol testing.

- Expand acceptable continuing medical education courses beyond classroom, conference, and seminars, to reflect other types of educational delivery systems.

There has been a change in the educational environment, and probationers may be able to complete more appropriate coursework not offered in the traditional classroom. Online courses, CD Rom courses, workshops, and other methods of education may be more suitable to probationers’ deficiencies. For this reason, the Board is proposing to allow other types of courses, rather than only those didactic courses taught in a classroom environment.

- Allow for participation in equivalent programs other than those provided by the Physician Assessment & Clinical Education (PACE) Program offered by UCSD, if approved by the Medical Board.

There are some physician competency assessment and educational programs in various locations other than the San Diego PACE Program. The new *Guidelines* will allow physicians to attend alternative but equivalent programs.

- Add a condition for participation in “Anger Management” programs.

Some physicians being disciplined have violated the standard of care not because of competency or skill problems, but due to impulse and anger control issues. For those physicians, it is of more value, and has more potential to protect the public, to order “Anger Management” courses, rather than the traditional practice courses. For that reason, the new *Guidelines* will allow probation to contain an order to take these types of courses.

- Allow for an oral competency examination in the event there are no appropriate clinical training programs available.

Occasionally, there are no courses available for physicians to address certain practice competency problems. In those instances, the only alternative is to order a competency examination to ensure protection of the public.

- Require that disciplined physicians provide pertinent documentation to the physician conducting a medical evaluation as part of a probationary condition

As a condition of probation for physicians who may be suffering from a medical condition that may affect their medical practice skills, a medical evaluation conducted by a physician may be ordered. In order for physicians conducting the evaluations to effectively do their work, full cooperation is needed. For that reason, the *Guidelines* have been amended to require the disciplined physician to cooperate with the evaluator and provide any relevant documentation requested.

- Within 7 days of the effective date of a decision, require disciplined physicians to provide a copy of the decision and accusation to the Chiefs of Staff at every hospital where the physician has privileges.

The past edition of the *Guidelines* contained the condition of probation that required physicians to notify facilities where they practiced of their disciplinary action, but did not contain a time-frame to fulfill the notification requirement. The new *Guidelines* are more specific, in that it provides that within 7 days, the physicians must notify facilities of their disciplinary actions. While physicians must notify facilities before they practice in them, facilities should be notified in advance in preparation for scheduling of procedures, etc. Seven days will give physicians who have privileges in multiple facilities ample time to notify all appropriate chiefs of staff.

- Require probationers that cease practice for over 18 months to complete a training program before resuming practice, and prohibit non-practice over 2 years.

Disciplined physicians may choose to cease practice while on probation for various reasons. A lengthy absence from practice has been shown to affect the competency of physician's medical practice skills. For this reason, the condition has been added to require training before they fully resume practice if out-of-practice for 18 months. The previous *Guidelines* provided for physician's licenses to be cancelled following two years of non-practice, without providing for due process for the licensee. The new *Guidelines* require the disciplined physician to practice within 2 years. If they do not, that will constitute a violation of probation, which allows for the individual to request a hearing and go through the administrative process.

Underlying Data:

As specified above, the 10th Edition (1999) of the *Manual of Model Disciplinary Orders and Disciplinary Guidelines* is referenced in current regulation. The 11th Edition (2009) of the *Guidelines* has been amended to reflect changes in law, changes in educational and probationary environments, and has also been amended for clarity and consistency.

The Medical Board has worked on the changes in the *Guidelines* for several months, culminating with a meeting on June 18, 2009 with interested parties, including professional associations and consumer organizations, defense counsels and prosecutors. (Minutes attached.) Suggestions made at that meeting, if appropriate, were incorporated into the 11th Edition of the *Guidelines*. In summary, the proposed changes were not controversial, and the Board would expect little comment, if any, in opposition to this rulemaking as a result of the comments heard at that meeting.

As discussed in the "Factual Basis" above, changes to the Guidelines have been made to clarify conditions, tighten requirements, remedy ambiguities in the previous edition, and offer alternatives that reflect the current law, educational opportunities, technological advances, and the probationary environment. The Board consulted with all interested parties, including prosecutors, defense counsels, professional organizations, probation officers and individual physicians to solicit comment into the proposed changes.
