2001-2002 ANNUAL REPORT Medical Board of California

1426 Howe Avenue, Suite 54, Sacramento, CA 95825 (916) 263-2389 • www.medbd.ca.gov

Board Tackles Challenges, Embraces Opportunities

The past year has been a year of change and reassessment of priorities for the Medical Board of California. As the terms of some members ended, and as new members were appointed, the Board is now constituted with a new membership that brings new ideas concerning how to meet its strong commitment to public protection. This has resulted in an active assessment of the present state of Board operations and a desire to forge new territory.

Over the past year, the Board has initiated a number of provocative discussions on topics such as alternative medicine and disclosure of more information to consumers. The Board's commitment to healthcare access resulted in working with the Legislature to develop a new loan payback program for physicians who commit to practice in underserved areas. Its interest in enhancing public protection resulted in the finalizing of outpatient surgery regulations and the appointment of an enforcement committee to recommend future improvements in enforcement operations. This Board will continue to examine issues facing healthcare and work toward innovative solutions. In the past year, the Board established the following committees that will assess and improve its performance and identify opportunities for change:

Enforcement Committee: The Committee's goal is to review the entire disciplinary/ enforcement process, from complaint intake through Attorney General prosecution, and to recommend and implement improvements in the process. The Committee will work with stakeholders, investigators, the Attorney General's Office, and other interested parties in making these improvements.

Public Education Committee: The

Committee's objectives are to increase the public's awareness of the Board's services; and establish greater collaborative relationships with various parties and stakeholders to improve the flow of information to enhance public safety and to better serve the profession. **Committee on Recertification:** The Committee is reviewing continuing competency and requalification for physicians and surgeons, and plans for periodic review of offshore schools to assess their relevance and efficacy.

Non-Conventional Medicine Committee:

The Committee will examine and develop recommendations relating to the laws and policies that govern non-conventional medical practice. It will not promote or denounce any particular practice or therapy. Discussions at meetings will be dedicated to the examination of legal and policy issues that impact the delivery of non-conventional methods in the practice of medicine.

Also during 2001-2002, the **Division of Licensing** implemented a system of online license renewal, which enables physicians to renew their licenses online through the Board's Web site while paying by credit card. Also, payment by credit card has been extended to include initial processing fees.

MISSION STATEMENT OF THE MEDICAL BOARD OF CALIFORNIA

The mission of the Medical Board of California is to protect consumers through proper licensing of physicians and surgeons and certain allied health professions and through the vigorous, objective enforcement of the Medical Practice Act.

Board Tackles Challenges, Embraces Opportunities (Continued from page 1)

Since January 2002, the Board's Division of Licensing has completed a second round of redesign workshops to streamline the application process, and the recommended changes are now operational. The positive outcome from these workshops is evidenced by a decrease in time for initial review of U.S. and Canadian applications, while not compromising public safety. In June 2002, the average review time was 30 days, down from 72 days the prior year.

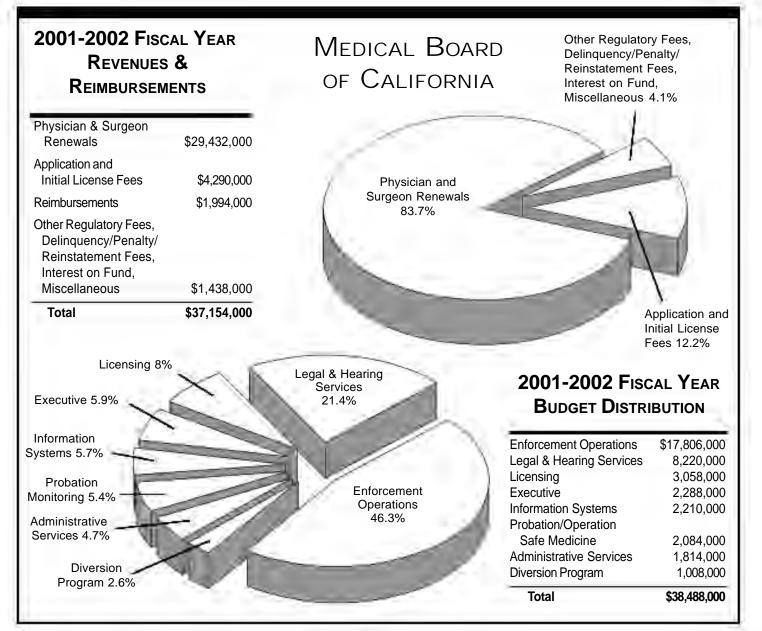

Legislation: The Board has begun implementation of AB 487 (Aroner), which requires physicians to take 12 credits of CME in pain management and the treatment of terminally ill and dying patients, and requires the Board to develop standards for review of pain management cases.

To improve healthcare in diverse populations and eliminate disparities in care, culturally and linguistically appropriate services are critical. Accordingly, the Board developed a proposal for establishment of a loan payback program for physicians practicing in underserved areas. This proposal resulted in AB 982 (Firebaugh), the Physician Corps Loan Assumption Program. The program authorizes medical school loan repayments to participating, qualified and licensed physicians who practice in underserved areas of California.

The Board approved proposed Complementary and Alternative Medicine (CAM) Disciplinary Policies and Procedures that will be included in the Board's Enforcement Operations Manual. Investigators will use the guidelines when investigating licensed and unlicensed CAM practitioners and when requesting expert opinions on CAM. This fulfills the requirement of SB 2100 (Vasconcellos, 1999-2000 legislative session).

As indicated by the foregoing endeavors, this has been an active year for the Medical Board of California and the real benefits will be realized as the Board's new directions are fully implemented.

We look forward to sharing these successes throughout the year and anticipate that next year's Annual Report will more fully reflect the continuing progress of its dedicated membership.

The Medical Board of California's Division of Licensing is committed to protecting the public and serving the medical profession by adhering to the highest standards of efficiency, and by ensuring that all statutory requirements are met as a precondition to the issuance of a physician's and surgeon's license. To best meet this standard, improvements to the licensing process have been implemented this past year with

noticeable results.

In addition to physician's and surgeon's licenses, the Division also licenses, registers and certifies various affiliated healing arts professionals and serves as the approving authority for those agencies that accredit outpatient surgery settings.

Licensing Process Improvements Update

In the 2001-2002 fiscal year 4,920 physician and surgeon licenses were issued, as compared to 3,777 in 2000-2001.

With the initiation of the new e-licensing program, physicians and surgeons can renew their licenses online. New applicants for physician's and surgeon's licenses can submit payment for an application online via

credit card, directly to the Board. At this point, this system does not displace the normal hard copy completion of the entire licensing packet and transmittal of that hard copy material to the Board.

Applicants can also continue to request an application by telephone or download an application from the Board's Web site and mail it to the Board for processing.

Fingerprint clearances from the Federal Bureau of Investigation and the

DIVISION OF LICENSING

Department of Justice are a mandatory part of the application process. If the applicant resides in California, there is now an electronic process available for fingerprint clearances, called Live Scan. This process significantly reduces the time frame to process fingerprint clearances. The Live Scan process has streamlined and essentially eliminated the need for paper fingerprint cards for California applicants. guest rotation. The Board has proposed changes to regulatory language in FY 02-03 to allow persons participating in an outof-state postgraduate training program (residency) to come to California and participate in a "guest rotation" (also referred to as an "away rotation") for a maximum number of days even if they have exhausted their normal exemption period as currently provided for in Business and

Professions Code sections 2065 and 2066.

Continuing Medical Education Audit

The Division recently completed the FY 01-02 audit for continuing medical education (CME). A total of 757 licensees were audited and, out of those, 653 passed. The licensees who failed the audit have received a letter from the Division notifying them of the outcome, and instructions for remediating the deficiency.

Legislative CMEUpdate

With the passage of AB 487 (Business and Professions Code section 2190.5), physicians are now

However, the paper cards are still available for those applicants who reside out of state or who prefer to use this method.

Legal Updates

A regulatory change to section 1320 of Title 16, California Code of Regulations, was implemented in 2000. An unintentional consequence of the amendment was that it affected out-of-state medical residents who come to California to participate in a required to complete, in addition to, or as part of the currently required CME, a mandatory one-time requirement of 12 credit hours of CME in the subjects of pain management and the treatment of terminally ill and dying patients.

The only exemption currently provided by this section of law is for those physicians who are practicing in pathology or radiology.

⁴ Includes 124 MDs, 3 podiatrists and 8 psychologists.

⁵ Includes 151 MDs, 2 podiatrists and 2 psychologists.

The Physician Diversion Program is a statewide, five-year monitoring and rehabilitation program. It is administered by the Medical Board of California to support and monitor the recovery of physicians who have substance-abuse or mentalhealth disorders.

The Diversion Program was created by statute in 1980 as a cost-effective alternative to discipline by the Medical Board. Diversion promotes public safety by encouraging physicians to seek early assistance for substance-abuse and mentalhealth disorders to avoid jeopardizing patient safety.

Physicians enter Diversion by one of three avenues. First, physicians may self-refer. This is often the result of concerned colleagues or family members encouraging the physician to seek help. Participation by self-referred physicians is completely confidential from the disciplinary arm of the Board. Second, physicians may be referred by the Enforcement Unit in lieu of pursuing disciplinary action. Finally, physicians may be directed to participate by the Board as part of a disciplinary order.

During FY 01-02, 52 physicians were accepted by the Diversion Evaluation

The data in this year's Annual Report has been reorganized in a more systematic fashion, grouping categories for ease of comparison. All of the information required by law is provided in a more readable and a more understandable display.

Last year the Enforcement Program experienced an increase of approximately 12% in the number of investigative cases opened compared to FY 00-01. There was also an increase of approximately 15%, compared to the previous year, in the number of cases referred by the Board to the Office of the Attorney General for the filing of administrative charges. Despite the increase in investigative cases opened, the average time to complete investigations fell below 200 days for the first time since FY 93-94. Last year, on average, it took 198 days to complete an investigation once the case was forwarded to a field office and assigned to an investigator. This continues the steady reduction from FY 94-95 when it required 345 days. The Enforcement Program will

Committee, signed a formal Diversion Agreement and entered the program. Of those, 37 physicians had no open cases with the Board, 10 physicians were diverted from discipline, and an additional five physicians entered as a result of disciplinary orders.

DIVISION OF MEDICAL QUALITY

continue to work to complete all investigations as quickly and objectively as possible.

Operation Safe Medicine The number of cases referred by Board investigators for criminal action during the past year also increased. The Board's unlicensed practice unit, Operation Safe Medicine (OSM), was responsible for much of the increase in criminal filings from 58 in FY 00-01 to 82 this FY. OSM has proved to be an effective mechanism for dealing with unlicensed activity and the so-called backroom clinics in the Los Angeles County and Orange County areas. Several criminal investigations conducted by OSM investigators have lead to the filing of felony and misdemeanor charges against unlicensed individuals treating various medical conditions.

Central Complaint Unit The Board's Central Complaint Unit (CCU) continues to do an outstanding job of reviewing and investigating complaints.

² Applicants are participants who either (1) have not been seen by a Diversion Evaluation Committee or (2) have not yet signed a Diversion						

During FY 01-02, a total of 389 physicians were monitored by the Diversion Program. Of the 62 who left the program, 12 were unsuccessful, while 50 successfully completed the five-year program, with a minimum of three years of continuous sobriety and a change in lifestyle that would support ongoing recovery.

More than 11,000 complaints were received last year. In addition to the increasing numbers, complaints are becoming more complex, requiring CCU staff to conduct more intensive review of the cases presented.

In the coming year, the CCU will be reorganized into two sections to better handle the wide variety of complaints received. The Quality of Care section will focus its efforts on reviewing/ investigating allegations of physician negligence or incompetence. Staff will prioritize cases, giving the highest priority to those cases which resulted in patient harm or death. Staff will perform an analysis of the physician's complaint and malpractice history and increase the involvement of medical consultant reviewers who have particular expertise in the same practice speciality. The Technical Violation & Physician Conduct Section will focus its efforts on complaints that do not pose an immediate danger to the health and safety of patients.
